

SUSHOVAN JANA

Java Backend Developer

+91 (933) 025 0635 | janasushovan5@gmail.com | <https://github.com/sushovan-jana> | <https://www.linkedin.com/in/sushovanjana/>

PROFILE SUMMARY

Java Backend Developer with hands-on experience building robust backend systems, Spring Boot applications, and REST APIs through academic and training projects. Developed stateless OTP-based authentication architectures, secure backend login systems, and full-stack platforms with MySQL integration. Skilled in designing layered backend architectures, database design, and implementing secure API endpoints using Spring Security and JWT.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+)

Backend Technologies: Spring Boot, Spring MVC, Hibernate, JDBC, REST APIs, Spring Security, JWT Authentication

Database Systems: MySQL

Concepts & Architecture: OOP, MVC Architecture, CRUD Operations, Backend System Design, API Design, Authentication & Authorization

Tools & Version Control: Git, GitHub, Maven, Postman

TRAINING EXPERIENCE

Java Full Stack Development Training

2025 – 2026

KodNest Academy

Certificate: <https://github.com/sushovan-jana/Certificates/blob/main/Java%20Full%20Stack%20Development.pdf>

- Completed training program focusing on Core Java, Advanced Java, Spring Boot, Hibernate, JDBC, MySQL, and JavaScript (ES6+).
- Built multiple backend projects using Spring Boot and REST APIs with MVC architecture.
- Practiced Data Structures and Algorithms (DSA) and strengthened problem-solving skills through hands-on development.

PROJECTS

OTP Authentication System

GitHub: <https://github.com/sushovan-jana/spring-boot-learning/tree/main/sb-13-otp-auth>

- Built stateless OTP-based authentication using Spring Security to enable secure, token-based verification.
- Implemented email OTP-based verification and session validation to secure user authentication flows.
- Designed extensible authentication flow for secure login systems, decoupling verification logic from user identity services.

Backend Login Application

GitHub: <https://github.com/sushovan-jana/spring-boot-learning/tree/main/sb-16-backend-login-app>

- Designed layered backend architecture (Controller, Service, and Repository layers) to isolate routing, business logic, and database access.
- Implemented secure REST API system with MySQL integration, including database validations and robust error handling.
- Developed REST APIs for authentication and user management, securing endpoints with Spring Boot frameworks.

SwasthyaLipi Healthcare System

Live: <https://swasthyalipi.com/>

- Developed SwasthyaLipi, a full-stack healthcare appointment booking platform with a real-time scheduling system using a MySQL backend.
- Designed and implemented schema structures to manage appointments, patient records, and scheduling constraints.
- Configured, optimized, and deployed the live application to production, managing end-to-end backend services.

EDUCATION

B.Tech in Computer Science and Engineering

2021 – 2025

Elite College of Engineering

CGPA: 7.97/10

Higher Secondary

2019 – 2021

Paniparul Mukteswar High School (H.S)

CGPA: 9.13/10

Secondary Examination

2018 – 2019

Gyandeep Vidyapith

CGPA: 9.46/10

CERTIFICATIONS

Java Programming (Core & Advanced) - Udemy

Certificate: <https://github.com/sushovan-jana/Certificates/blob/main/Java.pdf>

JavaScript (ES6+) - Udemy

Certificate: <https://github.com/sushovan-jana/Certificates/blob/main/JavaScript.pdf>
